Subject: Label Amendment – Label changes as requested by Agency in March 2018, and other minor label changes  
Product Name: Freestar  
EPA Registration Number: 9480-9  
Application Date: April 4, 2019  
Decision Number: 550566

Dear Mr. Marcelin:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance

*[The following instructions are to be included on production labels when claims against HIV, and/or HBV and/or HCV are listed; one, two or all three of the viruses may be included on claims and directions in production labels.]*

**KILLS HIV-1 (AIDS VIRUS), HEPATITIS B VIRUS (HBV) AND HEPATITIS C VIRUS (HCV) ON PRECLEANED ENVIRONMENTAL SURFACES/OBJECTS [AND PRECLEANED EXTERNAL SURFACES OF ULTRASOUND TRANSDUCERS [PROBES]] PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS** in three (3) minutes at room temperature (68°- 77°F) [*or* (20°- 25°C)] in healthcare or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS), Hepatitis B Virus (HBV) and Hepatitis C Virus (HCV).

**SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1, HEPATITIS B VIRUS AND HEPATITIS C VIRUS ON SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS**

**Personal protection:** When using this product, wear disposable protective gloves, protective gowns, face masks, and eye coverings [per facility protocol] when handling HIV-1 (AIDS Virus), HBV or HCV infected blood or body fluids.

**Cleaning procedure:** All blood and other body fluids must be thoroughly cleaned from surfaces and objects before disinfection by the [germicidal] cloth. Open, and unfold first [germicidal] cloth to remove [gross filth] [*or*] [*and*] heavy soil].

**Disposal of infectious materials:** Dispose of used towelette in accordance with local regulations for infectious waste disposal.

**Contact time:** Use second [germicidal] cloth to thoroughly wet surface. Allow surface to remain wet [*for*] three (3) minutes, let air dry. Although efficacy at a 30 second contact time has been shown to be adequate against HIV-1 (AIDS VIRUS), this time is not sufficient for the other non-HIV organisms listed on this label. Therefore, a 3 minute wet contact time must be used for all listed non-HIV organisms. *Or* [*For all other organisms see directions for contact times.*]
